SUMMARY

Highly motivated B.E. Computer Science graduate with 6 months software development experience seeking a Developer position. Proficient in MERN stack and eager to contribute to innovative web applications and grow in a collaborative development environment.

WORK EXPERIENCE

Software Developer Intern
Gantner Infotech India, Ahmedabad
Jan 2025 - June 2025

- Engineered a Remote Login & Configuration (RLC) system for the Infoplayz application, enabling seamless remote login on large display screens via encrypted QR code authentication.
- Implemented secure WSDL configuration and API validation, enhancing system reliability and security.
- Developed a scalable, role-based authentication framework using .NET and Angular 19, ensuring efficient access control and user management using responsive user interface . Integrated RabbitMQ for encrypted data transmission, enabling real-time communication and secure system interactions .

PowerBI Intern
Adani Mundra Petrochemicals Ltd
April 2024 – June 2024

- Developed an automated Power BI dashboard to analyze and visualize Mundra Petrochemicals-IT budget data (2023–2027), streamlining insights and updates.
- Executed data preparation and modeling using Power BI Query Editor, ensuring efficient processing, clarity, and alignment with organizational objectives.

EDUCATION

B.Tech in Computer Science
Adani University, Ahmedabad
Aug 2021 - Aug 2025

- CGPA : 8.9

PROJECTS

Ecommerce Web Application | [Github](#)
React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Socket.IO, Stripe

- Developed a comprehensive e-commerce platform with secure JWT authentication, Stripe payment integration, role-based dashboards, and admin panel for product moderation and user management
- Implemented shopping cart with persistent state and real-time updates, complete order management with payment processing, and real-time chat system using Socket.IO for user-seller communication
- Built responsive UI with Tailwind CSS and integrated MongoDB for scalable data storage of users, products, orders, and transaction history

Secure Voting System | [Github](#)
Node.js, Express.js, MongoDB, JWT, Aadhar Card Authentication

- Developed a secure backend voting system with Aadhar Card-based user authentication, JWT token management, and role-based access control separating voters and admins
- Implemented comprehensive candidate management APIs for admins (CRUD operations) and voting functionality ensuring one-vote-per-user policy with vote counting and analytics
- Built RESTful APIs with MongoDB integration for user profiles, candidate data, and vote tracking, featuring secure password management and profile update capabilities

SKILLS

Languages	Javascript, Typescript, Java, Python
Web Dev	HTML CSS React.js Node.js Express.js
Databases	SQL, MongoDB
Tools	Git, Github, Postman

CERTIFICATES

- Full-Stack Web Development Bootcamp - Udemy
